Those Doing The Hard Work Deserve The Best Care

Model: 8-Station Flex

Provide Your Customers With A Superior Shower

The Satellite Suites 8-Station Flex shower trailer offers you and your customers unequalled flexibility as well as many unique features. It can be configured for male/female use in a 4+4 or 2+6 floor plan, or as an 8 shower arrangement for one sex. And each stall has a changing area, shower and private lock.

As an operator, you will appreciate the lower towing weight (11,500 pounds), internal hose connections for easy wash-down, external fresh tank connection, 90% efficient tank-less water heaters and external cord and hose storage areas.

Perhaps the most important feature is the use of non-wood, and seamless wall, floor and ceiling surface materials to construct this trailer. Trailers made with a wood structure may experience rotting, mold and mildew due to water seeping into the framework, but not a non-wood Satellite Suites trailer. Our trailers are made to last and look beautiful for years to come.
